

To every Northfield citizen: Attached is a website that all citizens need to read and process to fully understand the huge new tax burdens that are befallen on all residents of the city of Northfield, Mn.
Like the bikeway \$31+ million project currently underway, this is next in line of the \$100 million parade of wasteful spending that the city council is blanketing its taxpayers with.
This exorbitant spending binge originates from the city council. It is not asked for by the citizens as a whole who pay for the bill for this unwanted expense.
The spending is not validated by data that would necessitate these massive projects. The huge size of these projects should allow those affected and paying the additional taxes to vote approval thereof.
You are encouraged to forward this website to all and anyone who is a taxpaying citizen in the city of Northfield and its environs. PLEASE ASK THEM to forward on to all they may know and so on.....
Also at the end of the website is a list of the Northfield city council who need to be told your thoughts and feelings.
You can also post questions and comments to the website that will be answered to you personally.

PLEASE take action rather than awaiting your next tax statements and assessments. You CAN make a difference!
